

neo Profile

The wide profile is great for illuminating larger objects

The variable 20–45° beam angle also makes it ideal for tight spaces.

Fits all known 3-phase circuit tracks.

Built in beam shaping shutters provides excellent control.

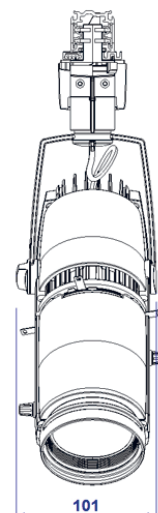

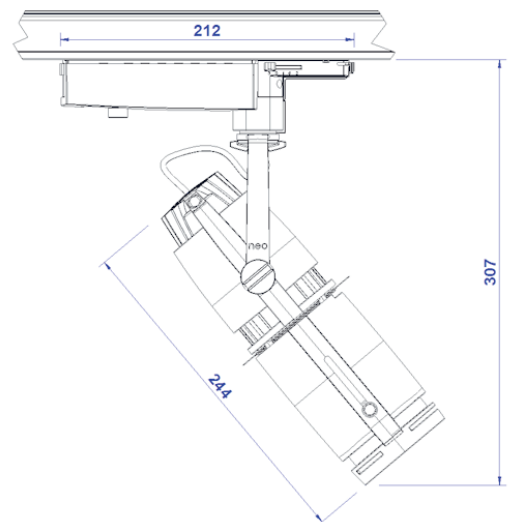

Description

Neo Profile Narrow is developed for use in museums and art galleries. Every fixture can individually handle all changable variables of the light. With two sliding lenses, you can adjust the size and focus on the light beam.

In addition to the analog and DMX series of Neo, a DALI and Casambi version is now available.
